 him via billy.souten@btinternet.com.
 The competition will be judged at the
 Leominster & Hereford Kite Festival in
 July 2019.
 Good luck to ALL that enter.

“I must endure the presence of a few caterpillars if I wish to become acquainted with the butterflies”

ANTOINE DE SAINT-EXUPÉRY (1900-1944)
French writer, poet and aviator,
author of The Little Prince

The butterfly spotter

Here are 12 of the UK's most common butterflies. See how many you can tick off the list this summer – on walks, on holiday or in the garden

RED ADMIRAL
With black wings that have orange and black and white spots on the rear, and dorsal markings in blue, red and black, and spots on the hindwings and along the edges, almost anywhere, from gardens to coast and moor.

PAINTED LADY
From white wings with black spots and orange and black markings, the female caterpillar has orange and black spots and a large white crescent-shaped mark on the back. It is found on flowers, especially in gardens and on vegetable patches. Where: most likely to be seen in gardens and on vegetable patches.

LARGE WHITE
From white wings with black spots and orange and black markings, the female caterpillar has orange and black spots and a large white crescent-shaped mark on the back. It is found on flowers, especially in gardens and on vegetable patches. Where: most likely to be seen in gardens and on vegetable patches.

SMALL TORTOISESHELL
It will common garden butterfly and one of the first to be seen in spring. It is bright orange and black and is often seen near the top of the canopy. The caterpillar has orange and black spots and a large white crescent-shaped mark on the back. It is found on flowers, especially in gardens and on vegetable patches. Where: most likely to be seen in gardens and on vegetable patches.

CABBAGE
Feeding a little like a caterpillar, but it is not a pest. It has brown markings on the hindwings and orange and black spots on the forewings. Where: most likely to be seen in gardens and on vegetable patches.

MEADOW BROWN
A bit of a character, brown with orange and black spots and a large white crescent-shaped mark on the back. It is found on flowers, especially in gardens and on vegetable patches. Where: most likely to be seen in gardens and on vegetable patches.

SMALL WHITE
The small white has a white wing with a black spot on the hindwing. It is found on flowers, especially in gardens and on vegetable patches. Where: most likely to be seen in gardens and on vegetable patches.

ORANGE TIP
The orange tip is a small butterfly with orange and black spots and a large white crescent-shaped mark on the back. It is found on flowers, especially in gardens and on vegetable patches. Where: most likely to be seen in gardens and on vegetable patches.

DOTTED BLUE
The common garden butterfly, often found around fields and on the coast. It is bright blue and black and is often seen near the top of the canopy. The caterpillar has orange and black spots and a large white crescent-shaped mark on the back. It is found on flowers, especially in gardens and on vegetable patches. Where: most likely to be seen in gardens and on vegetable patches.
